Introduction

The purpose of this workbook is to provide you with the knowledge about your project and what is expected of you. It also provides an insight as regards how you will be assessed. You are required to identify any software or system or program or application of your choice and do a comprehensive critique of it.

You are required to apply the theoretical knowledge gained in class in completing this project.

The document should provide the following information:

- Software description
- Provide user expectations or functions of the software or system
- Provide or run various software test on the software or system and identify bugs or defects
- Document the identified bugs or defects (you may include images or screenshots to enhance your findings)
- Outline a detailed recommendation on how the software or system can be improved upon based on your findings.

You are encouraged to be creative and analytical in your critique. You are also encouraged to be innovative when providing your recommendation.

This workbook will also provide you with the information about the purpose of Information systems , the rules and regulations that needs to be consider when doing and submitting the project, the marking rubrics that will give an idea as to how the marks are distributed during the project and **to** assist you in completing your project successfully.

General Information:

Module Lecturers (ordered by last name)

Name	Programme	Email Address
Ms N. Cele	DIIAD1	Noxoloc1@dut.ac.za

Department Office:

Ritson Road Campus
Department of Information Technology
2nd Floor B-Block Building

Consultations Times:

Your lecturer will publish consultation times.

Secretaries:

Name	Phone	Email Address
Ms. Winnie S. Xulu	0313735446	winniex@dut.ac.za
Mrs. Fiona C. Naidoo	0313735595	fionan@dut.ac.za

Roles and responsibilities of students

1. The project content should not exceed more than 10-15 pages (excluding cover page, table of contents, referencing).
2. Group must consist of approximately seven to eight (use existing App Dev group)
3. All reports must be typed in MS word document using Arial font, 12pts and 1.5-line spacing and MS PowerPoint for the presentation.
4. Include a cover page which has all group members' surnames, initials and student numbers.
5. You need to have a table of contents.
6. All work must be correctly referenced using the DUT Harvard referencing system.
7. Work in a team to develop the document.
8. Communication will take place either through WhatsApp or on Teams
9. There will be forum created on Moodle for any type of discussions needed regarding the project.
10. Each student will be responsible for their own work.
11. Every group member must be actively involved in the project.
12. In case of any team member being absence or (S)he is not participating, then the team leader should bring it to the lecturer notice well before hand.
13. Examination rules and plagiarism of DUT will apply for the project and assessments. It is the student's responsibility to present the necessary deliverables timeously for meetings, assessments and presentations.
14. No Handwritten work is accepted as a final submission. All work must be typed.
15. This is a group submission so only one document will be uploaded per group. Only the group leader needs to submit the document.
16. The report must also be submitted via Turnitin.
17. Ensure that signed plagiarism forms are attached after the cover page. Late submissions will be penalized 5% for every day late.

Project Information:

Software Testing is the process of verifying whether a software, system or program meets the specified requirements and produce desired results. It enables software tester to detect any bugs or errors in a software before the delivery of the software product. The testing process involves evaluating of the features of the software product in terms of missing any feature.

Software Testing is important because if there are any bugs or errors in the software, it can be identified early and can be solved before delivery of the software product. Properly tested software product ensures reliability, security and high performance which further results in time saving, cost effectiveness and customer satisfaction

****IMPORTANT****

You will need to check the plagiarism box, and ensure you click the submit button otherwise your work will remain as a draft and will not be marked.

If you do not belong to a group, you will not be able to make a submission. If you belong to more than one group, you will not get a mark.

Please ensure you check your work before submission to ensure that all the required information is included.

NB: **DEADLINE IS 04 Sept 2026.** All late submissions will be penalised 5% per day (weekends included) that they are late.

Appendix-1: Preliminary Marking Rubric:

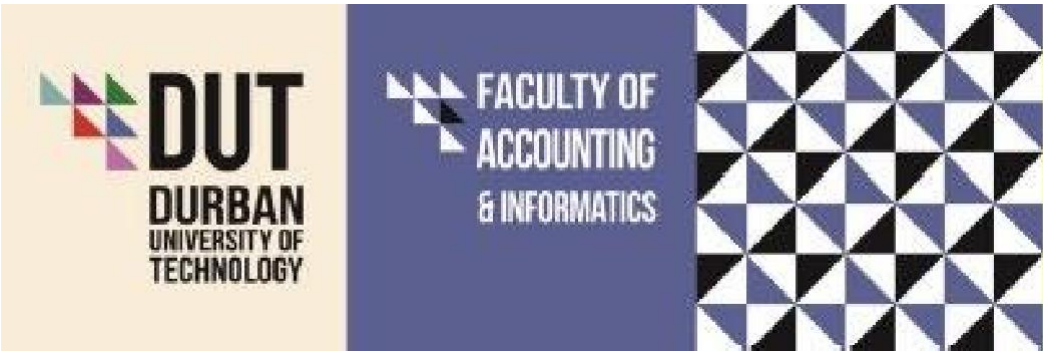

Points: 100	Team Project Number (1-5) or Abbreviation (e.g. DITAMS): Group Name: _____ Assessment Date:_____
Criteria	**Weightings**
1. Software description	**5%**
2. User Expectations or Functions of the software or program	**10%**
3. Software Testing Strategies 3.1 Describe the various types of test conducted 3.2 What software tools or techniques are used	**25%**
4. Documentation 4.1. Software Bugs or Defect identification	**25%**
5. Recommendation 5.1 How can the software be improved upon based on your findings	**15%**
Presentation **Referencing and Conclusion**	**10%** **10%**

Appendix-2:Marking Rubric for each section of the report	
Mark	**Nature of response**
0	No attempt made.
1 - 5	Inadequate effort, last minute attempt, poor understanding hence improper or imprecise write-up and/or design thereof.
6 - 10	Rushed effort, shallow write-up, understanding of components not convincingly demonstrated hence write-up and/or design could be clearer or improved.
11 - 14	Good effort, easy to read and understand logical flow of descriptions, application demonstrated adequately.
15 - 19	Excellent effort, insightful, innovative and highly detailed write-up and/or design. This response could be used as a memo.
20 - 25	Demonstrate a profound knowledge of aspects: write-up embodies writer's views supported by recent and relevant literature and the quality of write-up and/or design is sufficient for publication in journal. The response goes beyond requirements of assessment.
