1. Executive summary

The project aims to improve Sky Tech online system through several functions. Customers will be able to sell and buy products from Sky Tech. Sky Tech will also be able to buy from customer and sell back to them. Other functions include, managing repairs, job application management, loan application using collateral items, delivery, payment, and collection of items management. The system also aims for efficiency in order and returns management. Through digitalisation of these business processes, the system does not only improve operational efficiency but also customer convenience.

2. Business processes (List all Business processes for the project)

No	Business process	Sem / Inc	Brief description
1	*Purchasing items*	*1/1*	*Customers and staff purchase items online*
2	*Make payment for items*	*1/1*	*Make a payment of purchases*
3	*Order pick-up*	*1/1*	*The customer who opted for a store collection, picks up his or her order*

4. Use case description

Use case number	01
Use case name	Place order
Brief description	*Customer purchase items online*
Triggering event	*Customer decides to purchase items*
Actor(s)	*Customer, Staff member*
Preconditions	*Customer must have access to the system; Item must be available in stock*
Flow of activities	*1. Customers browse available items* *2. System checks item availability* *3. Customer adds item to cart* *4. Customer proceeds to checkout,* *5. Customer selects instore collection or delivery* *6. Customer selects preferred payment method* *7. Confirm payment* *8. System sends order confirmation and OTP* *9. System updates available stock quantity for purchased item*

Use case number	*02*
Use case name	*Make Payment*
Brief description	Customer makes payment for all items ordered
Triggering event	Customer wants to checkout to complete payment
Actor(s)	*Customer, Staff members*
Preconditions	*Customer must have access to the system; Items must be added to cart, an order must be created*
Flow of activities	*10. Customer/Staff proceeds to checkout* *11. System displays order summary and amount to be paid* *12. Customer/Staff selects payment method* *13. Customer/Staff enters card details*

	14. System validates card details *15. System processes payment transaction* *16. System generates a payment receipt* *17. System sends payment confirmation* *18. System generates a payment receipt*

Use case number	*03*
Use case name	*Pick-up*
Brief description	*The customer who opted for a store collection, picks up his or her order*
Triggering event	The customer's order is ready and available for collection
Actor(s)	*Customer, Staff members*
Preconditions	*The order must ready and available for pick up; Customer must bring the order reference number*
Flow of activities	*19. Send an email to the customer to confirm that order is ready for collection* *20. Customer provides an order reference number to confirm collection.* *21. Staff member verifies reference number* *22. Staff member verifies the customer's Identity document.* *23. After item has been collected, staff member marks order as collected.*

Use case number	*04*
Use case name	*Schedule delivery*
Brief description	*Store schedules delivery for items ordered by customers*
Triggering event	Customer chooses delivery option when placing an order
Actor(s)	*Staff member*
Preconditions	*Customer must have placed an order; delivery option must be selected*
Flow of activities	*24. Capture order details* *25. Choose available delivery slots* *26. System records delivery schedule* *27. System notifies the customer*

Use case number	*05*
Use case name	*Assign driver*
Brief description	*Store representative assigns driver for delivery a order*
Triggering event	Schedule delivery
Actor(s)	*Staff member*

Preconditions	*Delivery must be scheduled; Driver must be available; there must be items to be delivered*
Flow of activities	*28. System shows available drivers* *29. Staff member selects driver for delivery* *30. System updates delivery details with drivers' information* *31. System notifies driver of their assigned delivery*

Use case number	*06*
Use case name	*Make Delivery*
Brief description	*Driver delivers ordered items to respective customers*
Triggering event	*Order ready for delivery, Driver is ordered to do delivery*
Actor(s)	*Driver*
Preconditions	*Order has been paid for, delivery must be scheduled; driver assigned for delivery,*
Flow of activities	*32. Driver views a list of deliveries assigned* *33. Driver selects order to be delivered* *34. Driver starts delivery* *35. Customer provides OTP to confirm delivery* *36. Driver verifies OTP* *37. Driver completes delivery*

Use case number	*07*
Use case name	*Request Return*
Brief description	*Customer requests to return item that was ordered*
Triggering event	Dissatisfaction on the item ordered
Actor(s)	Customer
Preconditions	*Order must be within the return policy period; customer must have purchased the item*
Flow of activities	*38. Customer selects order with item to be returned* *39. Customer logs a return* *40. Customer provides a reason for return* *41. Customer chooses between refund or exchange* *42. Customer submits return request* *43. System notifies store representative*

Use case number	*08*
Use case name	*Return Item*
Brief description	*Customer returns item that was ordered*
Triggering event	The return request has been approved by the store
Actor(s)	Customer, staff member
Preconditions	*Return request must be approved;*
Flow of activities	*44. Customer presents the item and proof of purchase* *45. Staff member verifies the order receipt* *46. Staff member initiates the payment reversal* *47. Update the store inventory*

Use case number	*09*
Use case name	*Schedule collection*
Brief description	*The store schedules the collection of the faulty item from the customer after the return request has been approved*
Triggering event	Dissatisfaction on the item ordered
Actor(s)	Staff member
Preconditions	*Return request has been approved; Driver must be available for collection*
Flow of activities	*48. Staff member reviews approved return requests* *49. Staff member selects a return request* *50. Staff member chooses a collection date* *51. Staff member checks available drivers* *52. Staff member assigns driver for collection* *53. System notifies customer about collection date*

Use case number	*10*
Use case name	*Collect item*
Brief description	*Driver collects the faulty item*
Triggering event	Schedule collection
Actor(s)	Driver
Preconditions	*Return request has been approved; collection must be scheduled; driver must be assigned*
Flow of activities	*54. Driver views assigned collection tasks* *55. Driver navigates to customer address* *56. Driver collects the item from the customer* *57. Customer confirms collection through signature*

Use case number	*11*
Use case name	*Request repair*
Brief description	*Customer request for a repair service*
Triggering event	Customer wants to repair an item
Actor(s)	Customer
Preconditions	*Item details available*
Flow of activities	*58. Customer selects request repair option* *59. Customer enters item details* *60. Customer enters fault description* *61. Customer uploads item picture* *62. Customer submits request repair*

Use case number	*12*
Use case name	*Generate repair quotation*
Brief description	*Customer request for a repair service*
Triggering event	Customer wants to repair an item
Actor(s)	Technician, Customer
Preconditions	*Technician must be assigned to repair, Item details available*
Flow of activities	*63. Technician enter required components and quantity* *64. Technician enter the price of each component* *65. Technician sends the quotation to customer* *66. Customer approves the quotation*

Use case number	*13*
Use case name	*Evaluate request repair*
Brief description	*Staff member evaluates the submitted request repair service if it can be done.*
Triggering event	Customer made a request to repair an item
Actor(s)	Staff member
Preconditions	*Customer submitted repair request*
Flow of activities	*67. Staff member views made repair requests* *68. Staff member selects repair requests* *69. Staff member evaluates the item* *70. Staff member approves repair request*

Use case number	*14*
Use case name	*Assign Technician*
Brief description	*Admin assigns a technician to handle item to be repaired*
Triggering event	Repair request has been approved
Actor(s)	Staff member
Preconditions	*Technician is available*
Flow of activities	*71. Admin views approved repair requests* *72. Admin selects available technician* *73. Admin assigns technician to a repair request*

Use case number	*15*
Use case name	*Track repair progress*
Brief description	*Admin assigns a technician to handle item to be repaired*
Triggering event	Repair request has been approved
Actor(s)	Staff member
Preconditions	*Technician is available*
Flow of activities	*74. Admin views approved repair requests* *75. Admin selects available technician*

	76.Admin assigns technician to a repair request

Use case number	*16*
Use case name	*Handle warranty claims*
Brief description	*Staff member repairs items without billing, and make billing for items not under warranty*
Triggering event	Repair request has been approved
Actor(s)	Staff member
Preconditions	*Technician is available*
Flow of activities	*77. Admin views approved repair requests* *78.Admin selects available technician* *79.Admin assigns technician to a repair request*

Use case number	*17*
Use case name	*Generate repair invoice*
Brief description	*Staff member generates repair invoice once repair is complete*
Triggering event	Repair has been completed
Actor(s)	Staff member, Customer
Preconditions	*Item is ready for collection.*
Flow of activities	*80. Customer produces proof of the repair submitted* *81.Staff verifies the reference* *82.The customer is given the item.* *83.The invoice is generated and sent to the customer*

Use case number	*18*
Use case name	*Return item to customer*
Brief description	*The item is returned to the customer after the repair is completed.*
Triggering event	Repair request has been approved
Actor(s)	Staff member, Driver
Preconditions	*Technician is available*
Flow of activities	*84. Admin views approved repair requests* *85.Admin selects available technician* *86.Admin assigns technician to a repair request*

Use case number	*19*

Use case name	*Propose item*
Brief description	*Customer proposes to sell items online*
Triggering event	Select propose item option
Actor(s)	Customer
Preconditions	*Customer must have access to the system.*
Flow of activities	*87. Customer enters item details* *88. Customer uploads item picture* *89. Customer proposes selling prices*

Use case number	*20*
Use case name	*Evaluate item*
Brief description	*Staff evaluates the proposes item if it is in line with the items they buy and sell as a business*
Triggering event	Customer submits item to be evaluated
Actor(s)	Staff member
Preconditions	*Customer proposed to sell an item, user must have access to the system, Item details are available*
Flow of activities	*90. Staff member views the item details* *91. Staff member verifies the uploaded picture* *92. Staff member approves the selling proposal*

Use case number	*21*
Use case name	*Make purchasing offer*
Brief description	*The staff evaluates the item and proposes an offer to the selling customer.*
Triggering event	Staff selects an item and makes an offer for the item
Actor(s)	Staff member
Preconditions	*Selling proposal should be approved by the staff member*
Flow of activities	*93. Staff views submitted items* *94. Staff select item to evaluate* *95. Staff proposes selling price* *96. Staff submits proposed selling price*

Use case number	*22*
Use case name	*Sell item*
Brief description	*Customer agrees to the offer made by the store and proceeds with selling the item*
Triggering event	Customer accepts the offer made by the store
Actor(s)	Customer
Preconditions	*Offer has been made to the customer*
Flow of activities	*97. Customer views the offer* *98. Customer accepts the proposed selling offer* *99. Customer submits their banking details* *100. Customer enters collection address*

Use case number	*23*
Use case name	*Schedule collection*
Brief description	*The store schedules the collection of the item from the customer*
Triggering event	Customer accepted the offer made by the store
Actor(s)	Staff member
Preconditions	*Staff has evaluated the item, customer has accepted the offer, customer provided the collection details*
Flow of activities	*101. Staff member selects the item* *102. Staff member chooses a collection date* *103. Staff member checks available drivers* *104. Staff member assigns driver for collection* *105. System notifies customer about collection date*

Use case number	*24*
Use case name	*Collect item*
Brief description	*Store collect items sold by the customer*
Triggering event	The driver has been assigned for collection of an item
Actor(s)	Driver, Customer
Preconditions	*The price of the item must be agreed upon, collection has been scheduled*
Flow of activities	*106. Driver views assigned collection tasks* *107. Driver navigates to customer address* *108. Driver collects the item from the customer* *109. Customer confirms collection through OTP*

Use case number	*25*
Use case name	*Make Payment*
Brief description	*Store makes payment for items they bought from the customer*
Triggering event	Customer accepted offer made by the store, the item has been collected, the staff has evaluated the condition of the item as stated by customer
Actor(s)	Staff member, Customer
Preconditions	*Customer has submitted their banking details, Item has been collected and evaluated by staff member*
Flow of activities	*110. Customer enters banking details* *111. Staff selects payment method* *112. System validates card details* *113. System processes payment transaction* *114. System generates a payment receipt* *115. System sends payment confirmation* *116. System generates a payment receipt*

5. Minutes of meeting

5.1 Date and time of meeting

- 19 February 2026, 18:00

5.2 Duration of meeting

- 2 hours

5.3 Attendance – Present / Absent

- All team members were present

5.4 Minutes

5.4.1 Decision taken, responsible person(s)

- All team members presented their project ideas to the group.
- Two project ideas were selected as possible options to work on.
- The group decided to meet with the stakeholders of the respective companies to gather more information we can work on.
- A final decision on which project topursue will be made based on the information obtained from the stakeholders.

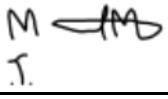

5.4.2 Allocation of tasks, responsible person(s)

- The group divided into two teams.
- One team consisted of five members.
- Each team will visit the stakeholders to collect relevant information

5.4.3 Issues / challenges identified – how to be resolved.

- On our first meeting there were no challenges we came across

5.5 Signatures

6.

6.1 Date and time of meeting

- 22 February 2026, 18:00

6.2 Duration of meeting

- 1 hour 30 mins

6.3 Attendance – Present / Absent

- All team members were present

6.4 Minutes

6.4.1 Decision taken, responsible person(s)

- The group did the analysis of the information gathered from the two stakeholders that were visited.
- The business processes of both companies were reviewed to understand how they normally operate and carry out their work.
- The group voted to decide on which business domain to focus on, between the two.
- The majority chose the insurance and financial services domain, specifically Golden Life Insurance.

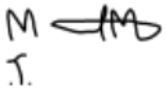

6.4.2 Allocation of tasks, responsible person(s)

- Each group member was assigned to study the selected business idea
- Members were also tasked with identifying and preparing possible use cases for the agreed project.

6.4.3 Issues / challenges identified – how to be resolved.

- Some group members preferred working on the insurance project, while others wanted to focus on the retail store project from SkyTech Company.
- The issue was resolved by creating a poll allowing members to vote for the idea they prefer.
- The project with the high number of votes was selected.

7.

7.1 Date and time of meeting

- 05 March 2026, 13:00

7.2 Duration of meeting

- 3 hour 30 mins

7.3 Attendance – Present / Absent

- All team members were present

7.4 Minutes

7.4.1 Decision taken, responsible person(s)

- After the submission of the proposal for insurance company the lectures advised the group to change the business domain.
- The group then decided to proceed with the second idea, which focuses on an online product purchasing and selling system.
- The business processes related to this idea were analysed to identify additional features that could be added so the project will be broad.
- The group discussed and identified business and system use cases.
- It was agreed which use cases would be implemented during the first semester and first increment, and for other increments.
- Members were assigned specific use cases for which they will be responsible during the development of the project.

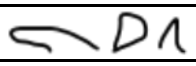

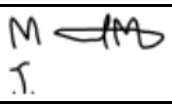

7.4.2 Allocation of tasks, responsible person(s)

- Group members were allocated specific use cases that they will be responsible for during the development of the project.

7.4.3 Issues / challenges identified – how to be resolved.

- Some members found it difiicult to fully understand other use cases.
- The group was unable to discuss all planned items within the scheduled meeting time without exceeding the allocated duration.
