The Graduate Recruitment / Career Services Office
Department of Information Technology
Durban University of Technology (DUT)

Dear Mr E Asmal

RE: REQUEST FOR GRADUATE RECRUITMENT – TECHNOLOGY INNOVATION DIVISION & JOINT COMMERCIAL OPERATIONS CENTRE

We as JJKhozatech (Pty) Ltd respectfully requests the assistance of the **Durban University of Technology (DUT)** in identifying and referring suitably qualified graduates for employment and professional development opportunities within our organisation.

JJKhozatech is a technology development company that develops software, hardware, computing solutions and telecommunications infrastructure, including telecom tower solutions. Through our **Technology Innovation Division (JJK-TID)**, we undertake technology research, software engineering, hardware and computing development, systems integration, prototyping and deployment.

We are seeking sharp-minded, technically capable graduates who demonstrate initiative, problem-solving ability, discipline, creativity and, most importantly, a strong willingness to learn, develop and work on real technology projects.

Graduate Requirements

We are particularly interested in graduates from the following disciplines:

- Informatics;
- Computer Engineering;
- Information Technology;
- Business Information Technology;

Graduate Opportunities

Position	Number Required	Business Unit
Software Developers	**15**	JJK Technology Innovation Division
IT Business Analysts	**5**	JJK Joint Commercial Operations Centre
Network Technicians	**2**	JJK Telecoms Infrastructure Operations

The **15 Software Developers** will participate in the development and implementation of JJKhozatech software applications, technology ecosystems, computing solutions and related innovation projects.

The **5 IT Business Analysts** will support the **JJK Joint Commercial Operations Centre**, contributing to business requirements analysis, technology-product analysis, customer

solutions, process optimisation, documentation, implementation support and the alignment of technology with commercial requirements.

We are also interested in identifying suitably qualified **Network Technicians** who can contribute to network deployment, telecommunications infrastructure, connectivity, technical support.

Our Graduate Development Approach

JJKhozatech is looking beyond academic qualifications alone. We are seeking graduates with intellectual curiosity, analytical thinking, adaptability, professional discipline and the capacity to learn quickly. Successful candidates will be exposed to practical work assignments and mentorship within JJKhozatech's technology and commercial operations.

We would therefore appreciate an opportunity to engage with DUT regarding:

1. Referral of suitable graduates and recent graduates;
2. Participation in graduate recruitment or career events;
3. Potential graduate screening and interview arrangements;
4. Future collaboration between DUT and JJKhozatech in R&D technology talent.

Kindly advise us of the appropriate process, to position JJKhozatech as an employer/recruitment partner and engaging with your department. The CVs of candidates should be directed to this email address: hr@jjkhozatech.co.za on the email subject must have institution name and qualification e.g DUT-IT.

We look forward to establishing a productive relationship with Durban University of Technology.

Yours faithfully,

Mr Joseph Jabulani Khoza
Chief Mathematical Ecosystems Architect
